

MOTION BASE

for Dynamic Storytelling

Realistic Motion Control & Virtual Environment Solutions

Motion Base offers specialized solutions for **motion-based visual effects** and the film industry. Our products are programmable and accurately mimic the real-world movements of a car, plane, helicopter, boat or anything else that moves. In this way, we allow your shots to be seamlessly blended with virtual effects.

SANLAB has a range of six axis motion bases available from 50kgs up to 14 tonnes.
